

QUINOA CRACKERS

Non-GMO
All Natural
No Additives or Preservatives
Never Fried
Wheat Free
Vegan

Quinoa, the "Lost Crop" of the Incas, Makes a Come Back, Japanese-Style!

One of the most sought-after grains by health-conscious consumers around the world today, quinoa has soared in popularity since being considered as a potential "new" crop for NASA's Controlled Ecological Life Support System (CELSS) in 1996.

According to the N.Y. Times, NASA declared that quinoa is virtually unrivaled in the plant or animal kingdom for its exceptional balance of amino acids and life-sustaining nutrients. Quinoa is as versatile as rice, but because it contains all the essential amino acids, its protein content is superior to that of most grains. It is also a good source of manganese, magnesium, phosphorous and copper, and is high in iron content.

Muso offers several products that include quinoa: Quinoa Crackers, Quinoa Arare, Quinoa Soba, and Quinoa Udon. In fact, Muso's Quinoa Crackers contain 50% quinoa. It blends perfectly with brown rice (the most versatile grain) and – with its light texture and nutty flavor – brings new inspiration to the traditional Japanese rice cracker.
